

INTANGIBLE BENEFITS OF BLABO TECHNOLOGY OVER CONVENTIONAL SLUDGE REMOVAL & TANK CLEANING METHODS

Intangible Cost	Conventional Methods	BLABO Technology
Time required prior to Hot Work	6 Months.	20 Days.
Separation Problem within Refinery	Yes.	None.
Extra Load on Effluent Treatment System	Yes.	None.
Water Requirement	Considerable.	Very little.
Quality of Recovered Oil	Not satisfactory.	As good as virgin crude oil.
Environment and Hygiene	Not satisfactory.	Eco-friendly and hygienic.
Manpower for Operations & Supervision	More personnel.	Much less personnel.
Coating & Tank Internals	Risk of damage.	No risk.
Fouling of Refinery Processing Equipment during Refining of Recovered Oil	Chances of fouling; Hence taken to FO / IFO system.	No fouling.
Time Spent by Personnel inside the Tank	Extended durations.	Minimal time.
VOC Emission / Air Pollution	Yes.	None.
Water Pollution	Yes.	None.
