GL	Total fat % % in total fat	6 33	16 12	5 20	22 9	20 10	18 11	- -	- -
LS9	Total fat % % in total fat	- -	16 12	5 15	- -	- -	- -	- -	- -
LPS	Total fat % % in total fat	- -	16 12	- -	22 14	- -	18 10	6 33	16 12
LP 16	Total fat % % in total fat	- -	16 12	- -	22 9	- -	18 18	6 33	16 12
GL II	Total fat % % in total fat	6 33	16 12	5 20	22 9	20 10	18 11	- -	- -
BL II	Total fat % % in total fat	6 33	18 11	5 20	20 10	20 10	18 11	8 12	- -

NOTE :

1. The "Total fat%" indicated above represents the normal % age fatliquor used in fatliquoring. "% in total fat" indicates the proportions in which the designated fatliquor can be used for obtaining the desired properties set out against specific products in the literature.
2. The usage shown above are not exhaustive. BALMOL® Fatliquors have been used singly or in combination for manufacturing a very large variety of Leathers.

Technique
October, 2009
