PGS	Total fat % % in total fat	6 33	14 22	8 25	8 25	16 25	16 22	16 10	6 33	16 10	22 20

NOTE :

- The "Total fat%" indicated above represents the normal % age fatliquor used in fatliquoring. "% in total fat" indicates the proportions in which the designated fatliquor can be used for obtaining the desired properties set out against specific products in the literature.
- The usage shown above are not exhaustive. BALMOL® Fatliquors have been used singly or in combination for manufacturing a very large variety of Leathers.

Technique

October, 2009
