The Vigilance Awareness Week was observed recently and we all pledged to continuously strive to bring about integrity and transparency in all our activities and eradicate corruption in all spheres of life. Corruption, as we are aware, is one of the biggest problems facing the Nation today. There is a lot of hue and cry about eradicating corruption and building transparency and accountability. The media is flooded with news on scams, bribes, influence peddling, black money etc. But how many of us are actually taking a step back and questioning ourselves "What am I doing to eradicate corruption?" It's time to introspect and consciously work towards uprooting this evil from our society.
